

1.

On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

2.

Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation.

3.

On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati.

Change Desktop Wallpaper and Set System Language to Hindi (macOS) – Step by Step

Open Apple menu and click on **System Preferences...**

In System Preferences, click on **Desktop & Screen Saver.**

Choose a wallpaper from the options. The selected wallpaper will be applied.

Go back to System Preferences and click on **Language & Region.**

In Preferred languages, click the **+** (plus) button to add a new language.

Search and select **Hindi (or Gujarati)** from the list and click **Add**.

The language has been added. Select **Hindi (or Gujarati)**.

Click **Use Hindi** to set it as the primary system language.

Desktop wallpaper is changed and system language is now **Hindi**.

4.

Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

Install Ubuntu Linux, Create User 'gamer' and Enable Automatic Login – Step by Step

- 1 Start Ubuntu Installation**

Boot from Ubuntu installer and click on 'Install Ubuntu'.
- 2 Choose Language**

Select your language and click 'Continue'.
- 3 Keyboard Layout**

Select keyboard layout and click 'Continue'.
- 4 Installation Type**

Choose 'Erase disk and install Ubuntu' and click 'Install Now'.
- 5 Create User Account**

Enter your name as 'gamer' and username as 'gamer'. Set password and click 'Continue'.
- 6 Installation Progress**

Wait for the installation to complete.
- 7 Installation Complete**

Click 'Restart Now' after installation completes.
- 8 Enable Automatic Login**

Go to Settings → Users. Turn ON 'Automatic Login' for user 'gamer'.
- 9 Login Screen (Automatic Login User)**

Login screen showing the user 'gamer'. (Automatic login is enabled for this user.)

5.

Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

1. **Backup your files**

- Save your photos, documents, and other important files to a USB drive or cloud.

2. **Make a Windows 10 USB**

- Use another computer to create a bootable Windows 10 USB.
- Use a USB drive of at least **8 GB**.

3. **Start the laptop from the USB**

- Insert the USB.
- Restart the laptop.
- Press the boot-menu key, such as **F12, F9, Esc**, depending on the laptop.
- Select the USB drive.

4. **Start Windows Setup**

- Choose your language and keyboard.
- Click **Install now**.
- Enter your product key, or choose **I don't have a product key**.

5. **Choose Windows edition**

- Select **Windows 10 Home** or **Pro**, matching your license.

6. Choose installation type

- Select **Custom: Install Windows only**.

7. Partition the disk

- Be careful—deleting partitions can erase files.
- For a completely clean installation, select the correct old Windows partitions and delete them.
- Select **Unallocated Space** and click **Next**.
- Windows will create the required partitions automatically.
- **Do not delete a recovery partition unless you know you don't need it.**

8. Wait for installation

- Windows will copy files and restart several times.
- Follow the instructions on the screen.

9. Set up Windows

- Choose your country and keyboard.
- Connect to Wi-Fi.
- Create or sign in to your account.

10. Check privacy settings

- Open **Settings** → **Privacy**.
- Turn off permissions you don't want, such as unnecessary location, camera, or microphone access.
- Review diagnostic-data settings during setup.

11. Install updates

- Go to **Settings** → **Update & Security** → **Windows Update**.
- Click **Check for updates**.

- Install available updates and drivers.

12. **Check everything**

- Make sure Wi-Fi, sound, Bluetooth, touchpad, camera, and display are working.

Steps that may be unclear

- The **boot-menu key** is different for each laptop.
- Partition names and sizes are different on every laptop.
- Product-key activation depends on your Windows license.
- Some laptop drivers may need to be downloaded from the laptop manufacturer's website.
- **Important:** Windows 10 support ended on **October 14, 2025**, so in 2026 Windows 11 is normally a better choice for a new installation if the laptop supports it.
